Really Solid Textile Board care

Really Solid Textile Boards are delivered either as the “raw textile” without surface treatment; or with surface treatment made from a stain- and scratch-resistant, melamine-based resin.

General Cleaning

Really Solid Textile Board without surface treatment absorbs water and should preferably be cleaned with a vacuum cleaner brush attachment or a dry cloth. If cleaning agents are necessary, use a mild household-cleaning product on a soft, damp cloth. Wipe the surface carefully; do not scrub.

Do not leave any water or cleaning agents on the surface. Be sure that the edges are not exposed to water and/or cleaning products for longer than necessary. The edges may absorb water and detergents, which can in time cause delamination of the Solid Textile Board.

Do not use any of the following on Solid Textile Boards with or without a melamine surface: commercial cleaning products, abrasive cleaners, scouring pads or abrasive papers, solvents, thinners, turpentine, ammonia, bleach, acetone or any other cleaning agents containing either organic solvents or the above-mentioned products.

The durability and impermeability of the melamine surface means that the cleaning methods recommended above should always be sufficient.

Stain removal on untreated Solid Textile Board

If you act quickly, it is not difficult to remove spills and prevent stains from forming.

First, scrape off any liquids or hardened residues before you proceed. Any loose particles must be vacuumed off before further cleaning. Liquids must be soaked up with an absorbent napkin or cloth.

Remove non-greasy stains by carefully dabbing with a clean, lint-free cloth or sponge wrung out in warm water. Edge marks can be avoided by dabbing gently in circular motions towards the centre of the stain. Remove greasy stains using a mild detergent. In all cases, we recommend testing stain-removal agents on an inconspicuous area first, to see if there is any effect on the surface.

Be sure to dry the Really Solid Textile Board fully before use. If necessary using a hairdryer, to avoid leaving edge marks.

These tips are only recommendations and cannot guarantee complete stain removal.

Warning

Do not rub the material vigorously. This could result in loss of colour or damage to the surface.
